

# Front-end Task Extreme Consulting

Create a responsive website with a main menu with 3 options: **Home**, **Lessons**, **Contact Us**.

## 1. Home

- Add a hero banner (dummy image and text).

## 2. Lessons

- Using the provided data (**data.json**) create a page using **React** or **jQuery** that fetches the data using **AJAX** and displays it following the provided design as closely as possible.

For each lesson there are 3 possible states:

- If **is\_completed** and **can\_practice** are both true display the “**repeat this lesson**” button and the **completed label/checkbox** on top of the image.
- If **is\_completed** is set to false, but **can\_practice** is set to true display the “**start now**” button
- If both **is\_completed** and **can\_practice** are set to false display the “**preview**” button

## 3. Contact Us

- Create a contact us form with the following fields: **Name**, **Email**, **Message**
- Validate all fields when clicking the send/submit button.

## Lessons Desktop view:

Day 1

Lesson 1

**Practice: Housetraining 1**

Repeat this lesson

Day 2

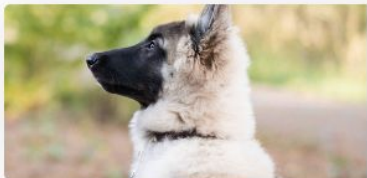

Lesson 2

**Practice: Coming when they're called 1**

Repeat this lesson

Day 3

Lesson 3

**Practice: Coming when they're called 2**

Start Now

Lesson 4

**Practice: Playing & fetch 1**
